SKILLS

SECURITY OPERATIONS

SIEM | EDR | DLP | VMDR | Incident Triage | Alert Analysis | SOC Workflows

NETWORK SECURITY

IDS/IPS | Firewalls | TCP/IP | DNS | VPN

TOOLS & ANALYSIS

Kali Linux | Nmap | Wireshark | Metasploit | OSINT

TECHNICAL

Python | Java | SQL | Linux | Windows | DBMS

PROFESSIONAL SUMMARY

Detail-oriented SOC Analyst L1 with a strong foundation in Computer Science and Engineering (IoT) and hands-on experience in security monitoring. Proficient in identifying security anomalies and performing initial log analysis across diverse platforms including SIEM and EDR systems. Demonstrated ability to categorize security events and perform triage to distinguish between true positives and false positives. Committed to maintaining comprehensive security logs and generating detailed reports to support organizational security posture.

WORK EXPERIENCE

Cybersecurity Intern — Codtech IT Solutions

Jul 2025 – Aug 2025

Remote / Hyderabad

- Monitored security events from multiple sources including SIEM and EDR to identify potential threats and anomalies.
- Performed initial analysis of security alerts to determine true positives vs false positives for escalation.
- Assisted in the categorization and triage of security incidents to support SOC investigation workflows.
- Supported execution of predefined incident response procedures for low-level security events.
- Maintained detailed logs and contributed to daily status reports for management review.
- Researched current cybersecurity threats to improve detection capabilities and response effectiveness.

Quality Checker — Medha Servo Drives Pvt. Ltd

Mar 2022 – Sep 2022

Hyderabad, Telangana

- Organized and archived quality documentation ensuring strict compliance with company standards.
- Participated in internal and external quality audits to maintain process integrity and accuracy.
- Identified and documented discrepancies in hardware components during QA inspections.
- Collaborated with production teams to address quality issues and improve manufacturing accuracy.
- Delivered regular reports on quality metrics for senior management review.

PROJECTS

SQL Injection Detection & Mitigation Tool

Machine Learning | Python | SQL

Built a machine learning-powered tool to detect and mitigate SQL injection attacks in real-time. The system analyzes incoming queries, classifies them as malicious or benign using trained ML models, and provides automated mitigation responses to protect web applications from SQLi vulnerabilities.

mysqlidmtml.netlify.app

SIEM Home Lab Setup

Splunk | Linux | VirtualBox

Built a fully functional SIEM environment using Splunk on a virtualized network. Configured log forwarding from Windows and Linux endpoints, created custom detection rules, dashboards, and alerts for brute force attacks, suspicious logins, and port scanning activities.

github.com/Aravind93911

Network Vulnerability Scanner

Python | Nmap | Scripting

Developed a Python-based automated vulnerability scanner leveraging Nmap for port discovery and service enumeration. Generates detailed HTML reports categorizing vulnerabilities by severity with remediation suggestions.

github.com/Aravind93911

SOC Alert Dashboard

Python | SQL | HTML/CSS

Designed an interactive SOC dashboard to visualize and track security alerts, incident status, and analyst KPIs. Integrated with a SQL database for alert storage, featuring trend analysis charts and automated daily summary reports.

EDUCATION

Bachelor of Engineering — CSE (IoT)

Sep 2023 – Present

Nawab Shah Alam Khan College of Engineering and Technologies, Hyderabad

CGPA: 7.55

Diploma — Electrical & Electronics Engineering

Jun 2019 – Aug 2022

Holy Mary Institute of Technology and Science, Hyderabad

CGPA: 9.1

SSC (10th)

Jun 2018 – Mar 2019

Gopi Memorial High School, Kushaiguda

CGPA: 8.3

CERTIFICATIONS & INTERESTS

- Cybersecurity Fundamentals — Codtech IT Solutions (2025)
- Active participant on TryHackMe & HackTheBox platforms
- Continuously exploring OSINT techniques and threat intelligence feeds
- Interested in malware analysis, digital forensics, and penetration testing
